

Collaboration for Innovation: Introducing the VT-iSIM System for Super-Resolution Imaging

S. Coleman¹

¹ VisiTech International Ltd. & EVIDENT Europe.

Abstract

EVIDENT Europe has entered into a collaboration with VisiTech International and is happy to showcase the VT-iSIM system during this Workshop. This innovative system provides super-resolution imaging with ultra-high temporal resolution, minimal photo-bleaching, and without the typical concerns associated with image artifacts. Additionally, it overcomes the traditional constraints of imaging depth, making it an exciting development in the field.
