

"Dive deep into your sample – the Miltenyi 3D imaging workflow"

A Khalili¹, G Arulmozhiarman¹

¹ Miltenyi Biotec B.V. & Co. KG.

Abstract

Visualizing three-dimensional architecture of complex organisms while subsequently analyzing whole biological processes are becoming the new standard in research. To provide a complete, smooth, and hassle-free 3D imaging workflow, Miltenyi Biotec covers this entire process offering solutions for sample staining, clearing, and imaging steps. In this workshop, we will guide you through the most important steps of sample preparation (including a real-time visual demonstration) and showcase how easy high quality 3D images of large samples can be acquired with our cutting-edge light sheet system, the UltraMicroscope Blaze™.
